Thank you to everyone who helped make this year's Community Garden such a success.

The garden was a valuable resource providing healthy veggies for our membership.

The garden was also a great learning resource for some of our younger members to take in the important lessons that come with working the soil.

We look forward to next year's Community Garden and getting even more people involved.

Jordan's Principle Questions and Answers

July 29, 2016

What is Jordan's Principle?

Jordan's Principle (JP) is a child first principle named in memory of Jordan River Anderson.
Jordan was a First Nations child from Norway
House Cree Nation in Manitoba. Born with complex medical needs, Jordan spent more than two years unnecessarily in hospital while the Province of Manitoba and the federal government argued over who should pay for his at home care. Jordan died in the hospital at the age of five years old, never having spent a day in his family home.

Jordan's Principle ensures that First Nations children can access public services on the same terms as other children without experiencing any service denials, delays or disruptions related to their First Nations status. The government of first contact pays for the service and resolves jurisdictional/payment disputes later.

Why is JP important?

Payment disputes within and between federal and provincial governments over services for First Nations children are not uncommon. First Nations children are frequently left waiting for services they desperately need, or are denied services that are available to other children. This includes services in education, health, childcare, recreation, and culture and language. Jordan's Principle calls on the government of first contact to pay for the services and seek reimbursement later so the child does not get tragically caught in the middle of government red tape.

What did the Tribunal say about JP?

In the decision on the case on First Nations child welfare, the Canadian Human Rights Tribunal ("Tribunal") concluded that the approach the federal government [Indigenous and Northern Affairs Canada ("INAC")] has taken regarding Jordan's Principle since Jordan's Principle was unanimously endorsed by the House of Commons in 2007, was discriminatory, contrary to section 5 of the Canadian Human Rights Act. In the January 26, 2016 ruling, the Tribunal ordered the federal government to immediately stop applying the discriminatory definition of Jordan's Principle and to immediately take measures to implement the full definition of Jordan's Principle.

On April 26, 2016, the Tribunal found that the federal government was not respecting the Tribunal's January 26, 2016 order to "immediately implement the full meaning and scope of Jordan's Principle." The Panel expressed its surprise that the federal government's discussions with partners and stakeholders were taking so long. The Tribunal ordered the federal government to immediately apply Jordan's Principle to all jurisdictional disputes (including between federal departments) involving all First Nations children. The Tribunal has said that going forward, the government organization that is contacted first needs to pay for the service for the child without policy review or case conferencing.

The Tribunal gave INAC until May 10, 2016 to report to the Panel to confirm that the definition and scope of Jordan's Principle outlined in the Tribunal's April 26, 2016 order had been

implemented.

While provincial governments and Health Canada are not parties to the Complaint before the Tribunal, the Tribunal's order is enforceable against INAC, meaning the federal government must do what the Tribunal says.

What steps did the federal government take to implement JP?

To ensure implementation of the remedies including Jordan's Principle, the Tribunal requires INAC to submit "compliance reports" which outline its action to date.

INAC's May 10, 2016 report said that disputes within the federal government were included, but did not specifically say the federal government is applying Jordan's Principle to all jurisdictional disputes. Their report also said that restricting JP to only children with multiple disabilities getting services from multiple service providers would stop, but did not specifically confirm that Jordan's Principle will apply it to all children. Lastly, the report stated that INAC had initiated discussions with the provinces/territories on Jordan's Principle but they did not say how, or if, First Nations and First Nations child and family service agencies would be engaged in those discussions or what the nature of those discussions would have been.

On June 8, 2016, the Caring Society responded to the May 10 report asking for clarification about the issues above and reiterated the importance of children being put first. The Tribunal is expected to rule again on Jordan's Principle to resolve the differences between what Canada was ordered to do and the compliance concerns raised by the Caring Society.

Community Health Assessment

What is it? Where are we at? Where do we want to be?

A community health assessment is important and often a first step in identifying areas of growth and opportunity. This assessment helps to identify the health needs of the community. The goal is to develop plans to address the needs and the identified issues.

We need your help...

The Community Health Program at Batchewana Health Centre is having a draw for a \$100 gift card in each community (Rankin, Goulais Mission, Obadjiwan). Give us your input; please fill out the survey and return it to the Community Health Nurse. We would like to know how we can assist the community in taking care of your healthcare needs.

A Community Health Nurse will be in each community at the end of October to assist with the survey and to answer questions. A light snack will be provided.

Tuesday, November 20th 4-8pm (Rankin) @ Batchewana Health Centre
Wednesday, November 21st 4-8pm Obadjiwan Community Centre
Thursday, November 22nd 4-8pm Goulais Mission Complex

Draw will be Friday November 23rd at noon.
